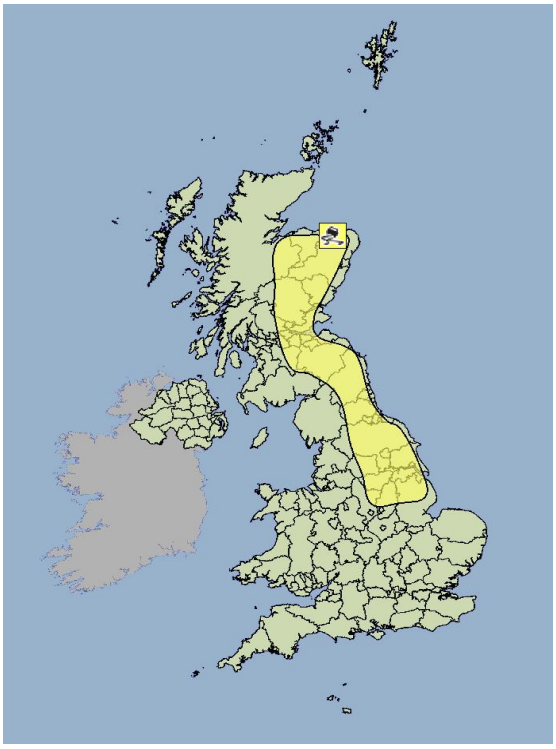
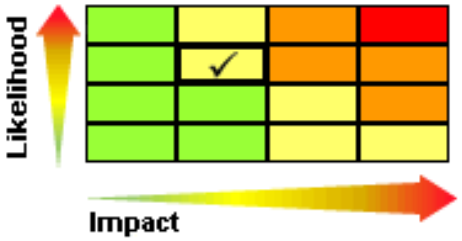
# National Severe Weather Warning Service





**Chief Forecasters Assessment**
Road surface temperatures are expected to be close to freezing or a little below during the night, particularly over high ground. With showers continuing to push in from the North Sea, surfaces will be wet in many areas and so some icy stretches are likely on untreated roads and pavements.

The Met Office have issued a **Yellow Warning** of **Ice**

Valid from **22:00 on Thu, 09th Feb 2017** until **10:00 on Fri, 10th Feb 2017**

Icy stretches are likely overnight as showers continue to push in from the North Sea. Some difficult driving conditions are possible as well as some localised slight accumulations of snow (1-2 cm in places).

**For more details please go to:**
